## TURKEYS

### Farm Production, Disposition, Cash Receipts and Gross Income, 1959-60

Turkeys raised in 1960 totaled 84.8 million birds, compared with 84.5 million raised in 1959. Increases in numbers raised of 10 percent in the West, 7 percent in the South Central, and 5 percent in the West North Central more than offset decreases of 25 percent in the South Atlantic, 6 percent in the North Atlantic and 4 percent in the East North Central States.

Minnesota and California were the leading States in number of turkeys raised in 1960 with 14.5 million each. In Iowa 7.7 million turkeys were raised, 4.7 million in Virginia, 4.3 million in Missouri, 4.1 million in Wisconsin, 3.9 million in Texas, 3.1 million in Ohio and in Indiana, and 2.8 million in Utah. The West North Central States, the region of largest production in the United States, raised about 35 percent of the Nation's turkeys in 1960, the West 25 percent, the East North Central 15 percent, the South Atlantic 11 percent, the South Central 10 percent and the North Atlantic region 4 percent.

Breeds Raised: Turkey growers raised 74.4 million heavy breed turkeys in 1960--up 8 percent from 1959. The crop of heavy white turkeys in 1960 was 30 percent of all heavies, compared with 27 percent in 1959. Light breed turkeys, which accounted for only 12 percent of the total raised in 1960, were down 34 percent from 1959.

Turkey Sales: Turkeys sold in 1960 (including home consumption) totaled 83.4 million head. Growers indicated that they sold 80 percent of their light breed production, 32 percent of the heavy whites and 1 percent of the other heavies as fryer-roasters.

Prices and Gross Income: The average price received for turkeys sold in 1960 was 25.4 cents, compared with 23.9 cents average a year earlier. Prices during the first 11 months of 1960 averaged higher than a year earlier, but during December 1960 turkey prices were below a year earlier. Gross income from sales (including home consumption) of 1,488 million pounds live weight of turkeys in 1960 totaled \$377.2 million--9 percent more than in 1959. Estimates of home consumption have been discontinued. Home consumption, which is now included with sales, accounts for less than 1 percent of the Nation's turkey production.

Death Loss: Loss of poults in 1960 was 8.8 percent of those started, compared with 8.6 percent in 1959. Loss of breeding stock as a percent of breeders on hand January 1 was 5.1 percent, compared with 5.4 percent in 1959.

Revisions: Revised production and disposition estimates for 1959 by States are shown in this issue. Estimates of turkeys raised were revised after making a review of the 1959 Census of Agriculture and of other data which have become available since the original estimates were made. Revised production and disposition estimates for the years 1955 through 1958 will be released in early May.

Turkeys: Farm production, disposition, cash receipts and gross income, by States, 1959

1/ Does not include young turkeys lost.

2/ Loss during the year of turkeys on hand January 1. Less than 500 is shown as 0.

3/ Production is the number (or pounds) available for utilization during the year, i.e., sales plus home consumption plus or minus the change in inventory. Production also equals the number (or pounds) raised minus death loss of birds on hand January 1.

4/ Change in inventory numbers during the year.

5/ Includes consumption in households of producers which is less than 1 percent of production for the United States.

1/ Does not include young turkeys lost.

2/ Loss during the year of turkeys on hand January 1. Less than 500 is shown as 0.

3/ Production is the number (or pounds) available for utilization during the year, i.e., sales plus home consumption plus or minus the change in inventory. Production also equals the number (or pounds) raised minus death loss of birds on hand January 1.

4/ Change in inventory numbers during the year.

5/ Includes consumption in households of producers which is less than 1 percent of production for the U.S.
